

Experience

Founding Engineer (Full Stack Web3), Moneda

Feb. 2025 — Present

- Building a user-friendly finance app using account abstraction and web3 technologies

React Native Typescript Viem Anvil ERC-4337 WebAuthn Prisma Turborepo NextJS tRPC Tamagui

Senior Full Stack Web3 Engineer, Evmos

Aug. 2024 — Jan. 2025

- Designed and implemented the open-source Evmos Burn Auction dApp, implementing frontend, backend and indexer
- Worked directly with protocol engineers to integrate with the latest unreleased features of the Evmos blockchain
- Collaborated with Full Stack team members on the implementation of the Evmos Trade Builder platform

React NextJS Typescript Viem TailwindCSS Prisma xstate ERC-4337 Vitest UI/UX Design

Product Manager Web3, Evmos

Feb. 2024 — Jul. 2024

- Drove product strategy for cross-chain applications team (xApps) and later the EVM team (evmOS)
- Authored comprehensive product requirements to align stakeholders and gather critical feedback early
- Developed and launched an EVM Learning Program curriculum to enhance team technical capabilities
- Conducted in-depth industry and market research to inform product roadmap decisions
- Successfully managed security incidents while maintaining protocol stability and user trust

Project Management Product Management Industry Research EVM Cosmos IBC UI/UX Design

Engineering Manager Web3, Evmos

Mar. 2023 — Jan. 2024

- Designed and launched the Evmos dApp Store and Copilot feature to simplify Web3 onboarding
- Implemented comprehensive testing infrastructure and documented the full stack architecture
- Created a growth framework team and coordinated hiring and promotion initiatives

Management Planning UI/UX Design React Typescript Cosmos EVM Cross chain

Senior Frontend Web3 Engineer, NEAR Foundation

May. 2022 — Feb. 2023

- Designed and implemented FUND3R, an open-source solution to run a compliant grant program on top of a DAO
- Worked closely with the legal team and built open-source integrations with different KYC providers
- Engineered `near-js-encryption-box` a library to encrypt and decrypt data on the NEAR Protocol

Typescript NextJS React Jest Playwright ExpressJS NEAR Protocol

Founder, CoinGenerator Tokens (side project as a hobby)

May. 2022 — Present

- Designed the end-to-end user experience of CoinGenerator Tokens, a no-code ERC-20 creation tool
- Engineered the architecture of CoinGenerator Tokens
- Implemented the full stack website using NuxtJS and ExpressJS

Solidity OpenZeppelin Truffle EVM NuxtJS ExpressJS VueJS TailwindCSS Bull

Co-Founder, CTO & Freelancer, Madarra (freelance agency)

Jun. 2017 — Mar. 2023

- Designed websites and communication materials for many clients such as GRTgaz, Cryptio, and Substances Actives
- Implemented websites for our agency and different clients such as Substance Actives, Offishall and GRTgaz
- Lectured UI/UX design at Sorbonne University and computer science to career changers

VueJS NuxtJS Symfony Laravel Typescript TailwindCSS UI/UX Design Lottie Photoshop After Effects Adobe Xd Elasticsearch Docker

Fullstack Web Engineer & UI/UX Designer, Quad9

Jul. 2020 — Feb. 2023

- Designed the User Interface and User Experience of Quad9's website
- Implemented a back office for content management using Strapi and Nuxt Content
- Built a static front-end of the website using NuxtJS that gets visited more than 500.000+ times per month

NuxtJS Strapi VueJS GraphQL Adobe Xd UI/UX Design SASS BEM

	Co-founder, Full Stack Engineer , Mycapacity (acquired by Orderli) Mar. 2020 — Aug. 2021
	<ul style="list-style-type: none"> Developed software for reservations, health check-in, and customer registration Onboarded over 500+ locations with 30.000+ users in the first 5 months. Nominated for Dutch Chamber of Commerce 'Impact Award 2020'. Symfony NuxtJS
	Full Stack Web Engineer & UI/UX Designer , IBM Jun. 2015 — May. 2017
	<ul style="list-style-type: none"> Designed and engineered an internal skill-sharing platform called CoachMe Onboarded over 30.000+ users in the first 12 months Awarded "IBM Outstanding Technical Achievement Award" for the project Symfony AngularJS Bootstrap UI/UX Design Photoshop
Education	Continuous learning , Learning Lab May. 2017 — Present
	Learning about one new topic every 1 to 4 months Web3 Solidity Hardhat Blockchain Trading Typescript Offensive Security NextJS Godot Design Flutter NativeScript Color Theory
	Professional Certification in Data Science , HarvardX May. 2023 — Apr. 2025
	Completed the Professional Certificate in Data Science program from HarvardX on edX. R Data visualization Probability Inference and Modeling Productivity Tools Data wrangling Linear regression Machine learning
	Bitcoin and Cryptocurrency Technologies Course , Coursera (Princeton University) Jan. 2018 — Mar. 2018
	Completed the online course about Bitcoin and Cryptocurrencies offered by Princeton University on Coursera Blockchain Cryptocurrencies Bitcoin Consensus Proof of work UTXO
	Master of Innovation and Management of Technologies , Sorbonne University Sep. 2014 — Jul. 2015
	Graduated with honor, valedictorian Business Creativity Innovation Team Management E-management Web marketing
	Master of Science in Industrial Engineer and Management , INSA Lyon Sep. 2008 — Jul. 2013
	Graduated from INSA Lyon, with a specialization in entrepreneurship and did an exchange Semester at Korea University Project management Strategy Marketing Finance Modeling and systems analysis Computer science User Interface / User Experience
Languages	English — Fluent (915 TOEIC) French — Native
	Spanish — Intermediate Korean — Basic
Interests	Learning new skills and building side projects, then writing about them; built more than 45 projects (see san.cx). Decentralization, open-source, and cryptocurrencies. Reading non-fiction books. Personal productivity systems and continuous learning and improvements. Art and content creation, writing, composing electronic music, and painting. Traveling and discovering new cultures and new foods; I visited more than 40 countries.
